

I urge you to reject NAB's petition 04-160. I drive truck and i can't begain to tell you how much the XM Radio helps us out there. It makes our job alot easier, because they care and are always willing to help us. Some night can get pretty long and the XM Radio has helped keep me awake many night It also tells us what to expect when we get close to a major city. We can change our way of going through if there is a accident or a major backup for one reason or another. So i urge you again to reject NAB's petition 04-160. Thank you
